#### ABSTRACT

This report presents information about students who transferred from Cabrillo College (California) to one of three local universities. It is intended to aid in planning the expansion of the Watsonville Transfer Center at Cabrillo College. Transfer data came from four sources: final transcript requests submitted by Cabrillo students, data from the University of California at Santa Cruz (UCSC), data from San Jose State University (SJSU), and data from Cal State University at Monterey Bay (CSUMB). Watsonville Center students enrolled in at least one course offered at the Center between spring 1993 and fall 1999. Over half of all Cabrillo College students from either the Watsonville Center or elsewhere transfer to UCSC or SJSU. The proportion of Watsonville Center student transfers appears to have been declining relative to the proportion of the total enrollment at the Watsonville Center. Further, the proportion of Watsonville Center students who stated that transfer is their goal has been consistently less than other Cabrillo students. The city of Watsonville supplies the largest number of students to the Watsonville Center. Over half of Cabrillo's Watsonville area students are enrolled through the Watsonville Center and proportionately more of them are Hispanic and female. (Contains 1 table and 6 figures.) (VWC)

#### Transfers of Cabrillo College students from the Watsonville Area

Terrence Willett Research Technician Office of Institutional Research March 28, 2000

#### Introduction

This report describes transfers from students who took coursework at the Watsonville Center to aid in planning the expansion of the Watsonville Transfer Center at Cabrillo College.

#### Methods

Transfer data came from four sources. One source is the final transcript requests submitted by Cabrillo students. It was assumed that those who submitted only one request intended to attend that institution. If multiple requests were submitted in the same or sequential years, they were not included for analysis as it is impossible to determine which institution they actually attended, if any. If multiple requests were separated by more than two years, the most recent request was used. In all cases, it is unknown from this data if the student actually attended these institutions; however, it is the best data available for most institutions.

The second source is data from the University of California at Santa Cruz (UCSC), the third is data from San José State University (SJSU), and the fourth is data from Cal State University at Monterey Bay (CSUMB). These institutions have provided Cabrillo with data on their students who transferred from Cabrillo. These sources are more reliable, which is especially good as over two-thirds of our transfers go to UCSC, SJSU, or CSUMB.

Watsonville Center students are those who enrolled in at least one course offered at the Watsonville Center between Spring 1993 and Fall 1999.

Data were analyzed with Brio Enterprise 6 and SPSS 10.0.5.

3

#### **Results and Discussion**

Over half of all our students from either the Watsonville Center or elsewhere transfer to UCSC or SJSU (Table 1). The proportion of Watsonville Center student transfers appears to have been declining relative to the proportion of the total enrollment that Watsonville Center students comprise (Figure 1). Further, the proportion of Watsonville Center students who stated a transfer goal has been consistently less than other Cabrillo students (Figure 2).

As would be expected, Watsonville supplies the largest number of students to the Watsonville Center (Figure 3). Over half of Cabrillo's Watsonville area students are enrolled through the Watsonville Center (Figure 4) and proportionately more of them are Hispanic (Figure 5) and female (Figure 6).

Table 1. Transfer institutions of Cabrillo students enrolled at the Watsonville Center and elsewhere.
